# Concept Panelboards

## Verified to AS/NZS 61439

An extensive and flexible range of panelboards to suit your various application needs

POWER DISTRIBUTION AND PROTECTION

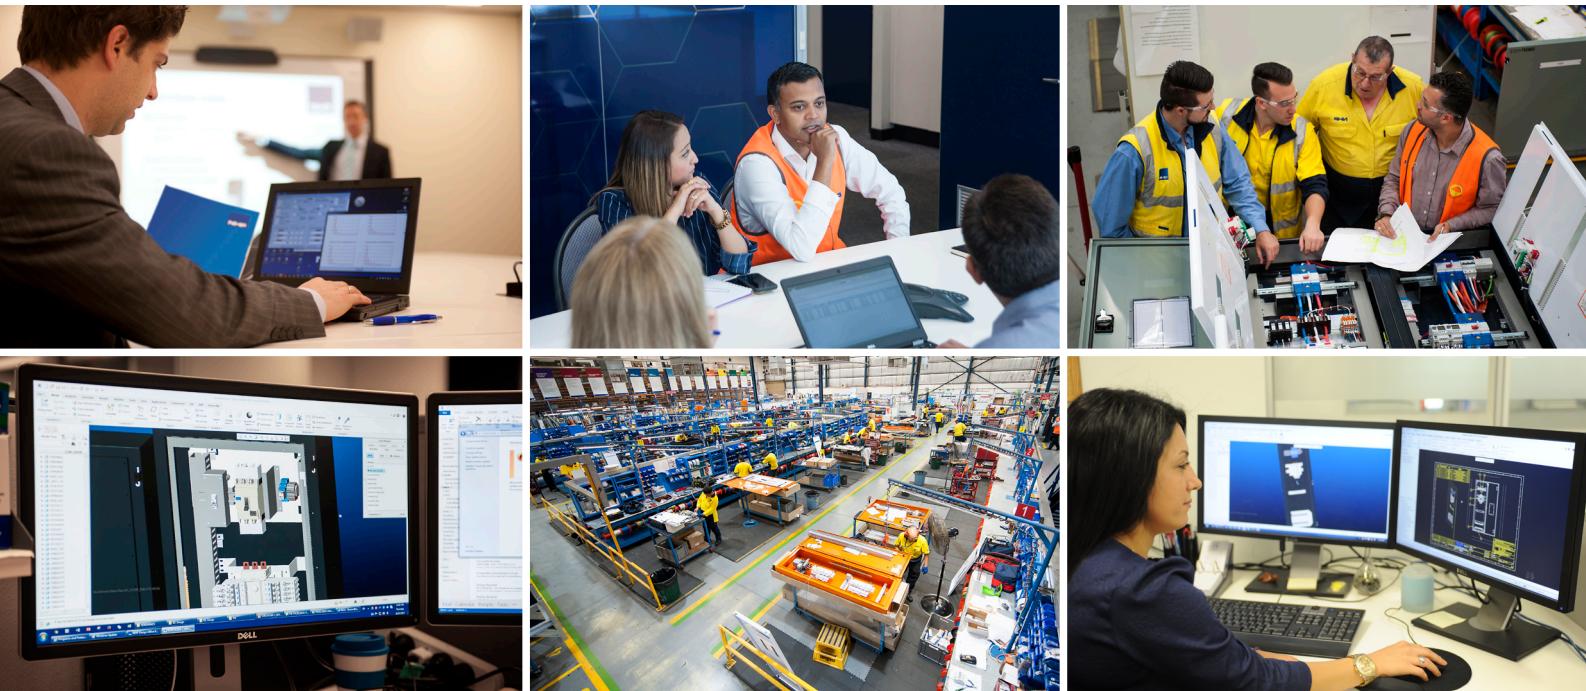

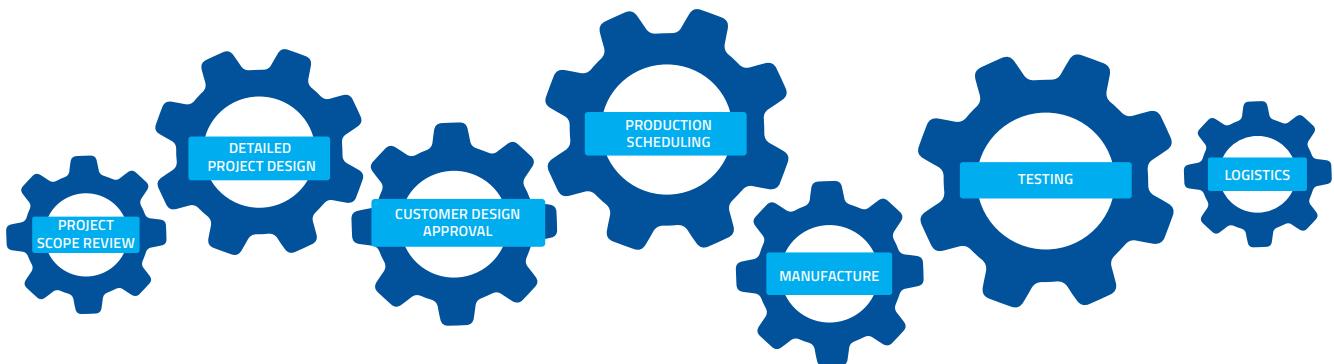

## NHP's Concept panelboard range

The Concept range has a panelboard model to suit just about all applications, from standard configuration to a unique design. NHP's new design tool Xpress ProDesigner (XPD) can turn around a specific request into custom design within minutes. XPD linked to NHP's National Manufacturing and Distribution Centre can successfully deliver a custom engineered solution from end to end.

- Personalised end-to end manufacturing service with a dedicated project team
- Engineered solutions delivering quality, reliability and performance
- State of the art manufacturing facility operated by highly skilled personnel

NHP's National Manufacturing and Distribution Centre in Laverton, Victoria highlights NHPs commitment to local manufacturing and expertise. At this state of the art facility, our expert team brings together a range of manufacturing solutions under one roof, enabling us to provide you with what you want, when you want it.

With interactive tours of the National Manufacturing and Distribution Centre available, visitors are able to view and experience the cutting edge technology and quality product that is brought to life at the facility (note tours available by appointment only).

<b>Top 10 reasons to use Concept panelboards</b>	<b>4</b>
--	----------

<b>Selection tables</b>	<b>6</b>
-------------------------	----------

<b>Concept One</b>	<b>9</b>
--------------------	----------

The essential panelboard

The Concept One panelboard is the first in the Concept range offering core range of essential features. Concept One offers compact enclosure with a neutral finish to blend in.

<b>Concept Plus</b>	<b>13</b>
---------------------	-----------

The multipurpose panelboard

The Concept Plus panelboard is a multipurpose panelboard for general purpose applications offering a large range of features and options. Concept Plus offers IP42 rating with option IP52.

<b>Concept Premier</b>	<b>23</b>
------------------------	-----------

The premium panelboard

The Concept Premier panelboard is a premium panelboard offer all the feature of Concept Plus but also includes additional features such as IP66 rating, 3 point door locking and a stainless steel option. The increased depth between escutcheon and door allows load break handles and locking devices to be fitted.

<b>Concept Tough</b>	<b>34</b>
----------------------	-----------

The heavy duty panelboard

The Concept Tough panelboard range is constructed from fully welded 2mm mild steel or 316 marine grade stainless steel for those extra tough environments. Concept Tough has all the features of Concept Premier plus more, including increased depth, width and material thickness for extra strength.

<b>Concept accessories</b>	<b>37</b>
----------------------------	-----------

A general range of accessories that suits Concept panelboards such as schedule cards, spare keys, touch up paint and earth and neutral bars

## Top 10 reasons to use Concept Panelboards

### 1. Cable management

- Support brackets with built in tie down points for better cable management
- Rolled edged to prevent damage to cables
- Plenty of wiring room
- Allows quicker and neater install

### 2. IP2X touch protection

- Helps prevent accidental contact with live conductors
- Fully shrouded connections between main switch and busbar chassis
- Encapsulated busbar style chassis with tee-off caps covering live tee-offs

### 3. Handle locking options

- 
- Semi flush swing handle – increased vandal resistance, helps prevent being caught on when boards are mounted in hallways
  - Different locking options CL001, 92268, pad lockable, non-locking, E-Key options, 8mm square. Simply remove and replace handle
  - Stainless steel handle options
  - Smoother closing action with use of 3 point roller cam
  - No more scraping metal edges and potential paint damage

### 4. Inter changeable main switch

- Main switch can be retrofitted with either Concept isolator or Terasaki MCCB in the field
- Concept isolator offers excellent short circuit rating Icu 25kA
- Can be padlocked with captive accessory or non-captive accessory

### 5. Pad locked devices with door closed

- The door can now be closed with padlocked devices such as; a main isolator, main switch MCCB, load-break switches and MCBs
- Increased depth between door and escutcheon

## 6. Din knockouts

- Quickly add accessory items by knocking out built in knockout in the escutcheon
- No need to use pole fillers
- No more lost pole fillers

## 7. Hinged escutcheon

- In Concept Plus and Concept Premier, the escutcheon is hinged as standard
- Escutcheon is easily removed

## 8. Tough paint finish

- New textured paint finish to hide damage that often occurs during handling and installation
- Helps prevent scuff marks and hides finger marks

## 9. New true modular system

- Height of boards are made to true modular system based on 216mm modules
- Allows different size boards to be joined or mounted side by side.

## 10. Supporting documentation

- Declarations of conformity to AS/NZS 61439
- Genuine IP ratings, 3rd party test reports, NATA accredited test station
- Piece of mind ratings

## Complete range of modular circuit breakers and accessories

DIN-T is a complete range of circuit protection devices and associated accessories from NHP.

The DIN-T range offers an extensive and flexible product that meets the needs of the ever-changing demands of switchboard design.

### NHP's Din-T range

- Miniature circuit breakers (MCBs)
  - 6kA, 10kA and 15kA
  - 1P, 2P, 3P and 4P
  - 0.5A-125A
- Residual current circuit breakers (RCBOs)
  - 6kA and 10kA
  - 1P, 2P, 3P and 3P+N
  - 10mA, 30mA, 100mA, 300mA
  - 6A-40A
- Residual current devices (RCCBs, RCDs)
  - 2P - 3P+N
  - 30mA, 100mA, 300mA
  - 40-80A

- Accessory devices
  - Shunt trip
  - Under voltage trip
  - Motor operators
  - Busbar combs
  - Pin terminal
  - Terminal shrouds
  - Lock off devices

When compared to traditional circuit breakers, the DIN-T range of devices under short circuit conditions have very quick operational times, typically 2mS, resulting in very low energy let-through values, minimising damage to downstream cables and devices and as a result increasing their operational life.

**DIN-T®**

## Concept One

The essential panelboard - for MOD6 or DIN-T MCBs

## Concept One

### The essential panelboard for MOD6 or DIN-T MCBS

#### Domestic and commercial applications

- Neutral finish with RAL7035 light grey colour to blend into background for commercial applications.
- Gloss white lift off escutcheon that is independent from the door
- Knockouts in the escutcheon for up to 16 modules of extra DIN rail equipment
- 5 enclosure sizes 432mm-1296mm high
- Door hinged right-hand side
- Semi flush door swing handle with various door locking options
- Compact main-switch options 160A or 250A isolator or 100-200A MCCB
- Earth and neutral bar, circuit identification and schedule cards as standard
- Semi concealed door hinges

<b>Material type</b>	1.0 mm steel enclosure 1.0 mm steel escutcheon

#### Commercial and industrial applications

- IP42 rating, optional kit for IP52 rating
- Grey or orange colour options
- 1.6mm fully welded construction
- Gloss white removeable hinged escutcheon that is independent from the door
- Knockouts in the escutcheon for up to 18 modules of extra DIN rail equipment
- 8 modular sizes cover the range from 24 - 96 pole (432mm-1944mm)
- Door hinged right-hand side
- Semi flush door swing handle with various door locking options
- Compact main-switch options 160A or 250A isolator or 100-200A MCCB
- Dual earth and neutral bars
- Earth and neutral bars, circuit identification and schedule cards included as standard
- Semi concealed door hinges

Material type	1.6mm steel enclosure 1.0/1.2mm steel escutcheon
Finish	Textured polyester powder coated

## Concept Plus

### Standard panelboard - CPL

NC 250A busbar chassis top feed 3P

### X-Row panelboard - CPLX

Extra row 24 poles of DIN at bottom of board for general DIN accessories

### Dual energy metering panelboard - CPLMD

Dual energy meter monitoring light and power circuits separately

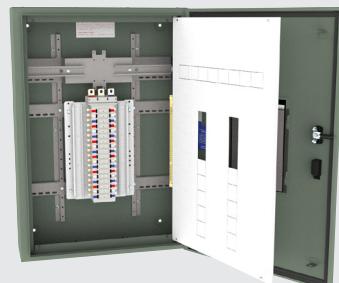

CPL panelboards are available in either grey or orange options.

CPL panelboards can be fitted with 160A or 250A isolator main switch or 160A or 200A MCCB main switch.\*

\*Excludes metering CPLM panelboards

### Isolation panelboard - CPLG

Isolation chassis GB 250A busbar chassis top feed 3P, busbar tee-off can be isolated prior to fitting or removing MCBS

### Energy metering panelboard - CPLMS

Single energy meter monitoring total panelboard consumption

### For more options, please contact NHP

- Compact Concept POWERBUS system
- Splits chassis for load shedding or metering
- Other main switch options
- Surge protection
- Emergency lighting control

## Concept Premier

The premium panelboard for DIN-T MCB and MCCB

## Concept Premier

### The premium panelboard for DIN-T MCB and MCCB

#### Commercial and industrial applications

- IP66 rating
- Grey or orange colour options in mild steel
- Orange or natural finish in stainless steel
- 1.6mm fully welded construction
- Gloss white removable hinged escutcheon that is independent from the door
- Knockouts in the escutcheon for up to 18 modules of extra DIN rail equipment
- 8 modular sizes cover the range from 24 - 96 pole (432mm-1944mm)
- Door hinged right-hand side
- Semi flush door swing handle with various door locking options
- Compact main-switch options 160A or 250A isolator or 100-200A MCCB
- Earth and neutral bars, circuit identification and schedule cards included as standard
- Dual earth / neutral bars
- Semi concealed door hinges

Material type	1.6mm Steel enclosure 1.0 / 1.2mm steel escutcheon
Finish	Textured polyester powder coated
Colour	Enclosure – Grey (N42 storm grey) Enclosure – Orange (X15) Escutcheon – Bright White gloss
Protection degree	IP30 without door IP66 with door
Busbar ratings	Current Rating 250A (option 400A) NC 250A $I_{cw}$ 25kA 0.1s 20kA 0.3s & 10kA 1.0s NC 400A $I_{cw}$ 30kA 0.1s, 25kA 0.3s GB 250A $I_{cw}$ 25kA 0.1s & 10kA 1.0s

## Concept Premier

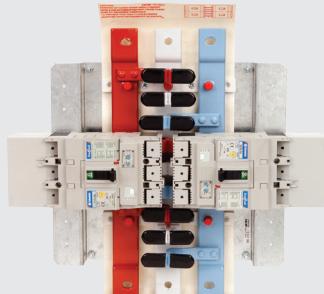

### Standard panelboard - CPR

NC 250A busbar chassis top feed 3P

### MCCB panelboard\*

MCCB chassis busbar chassis suits Terasaki MCCBs

### Isolation chassis panelboard\*

Isolation chassis GB 250A busbar chassis top feed 3P, busbar tee-off can be isolated prior to fitting or removing MCB captive locking mechanism option

### 400A Panelboard- CPRH

NC 400A busbar chassis with VLB 400A main isolator.

### Captive locking panelboard LOCKDIN\*

Escutcheon cut-out suitable for MCB captive locking system "LOCKDIN"

### For other options contact NHP

- Compact Concept POWERBUS system
- Single sided MCCB chassis options
- Hybrid chassis suits 80-125A MCBs and 0.5-63A MCBs
- Surge protection
- Emergency lighting control

CPR panelboards are available in either grey, orange, orange stainless steel or natural stainless steel options.

CPR panelboards can be fitted with 160A or 250A isolator main switch or 160A or 200A MCCB main switch.\*\*

\*Made to order - please contact NHP

\*\*Excludes MCCB chassis panelboards

## Concept Tough

The heavy duty panelboard for DIN-T MCB and MCCB

## Concept Tough

### The heavy duty panelboard for DIN-T MCB and MCCB

#### Commercial and industrial applications

- IP66 rating
- 2mm fully welded construction
- Available in stainless or mild steel construction
- Gloss white lift-off hinged escutcheon that is independent from the door
- Generous depth between door and escutcheon allow wide range lock-off devices
- Knockouts in the escutcheon for up to 18 modules of extra DIN rail equipment
- 4 modular sizes cover the range from 24 - 96 pole (500mm - 2000mm)
- Door hinged right-hand side
- Pad lockable semi flush door swing handle
- Large gland plates to allow for incoming/outgoing cables
- Compact 250A main-switch
- Mount up to a CA 6-420 contactor behind the escutcheon
- Earth and neutral bar, circuit identification and schedule cards as standard
- Dual earth / neutral bars
- Semi concealed door hinges
- Available in stainless or mild steel construction

Material type	2.0mm steel 1.6mm escutcheon
Finish	Textured polyester powder coated (mild steel version)
Colour	Enclosure – orange (X15) Escutcheon – bright white gloss
Protection degree	IP30 without door IP66 with door
Busbar ratings	Current rating 250A NC 250A $I_{cw}$ 25kA 0.1s, 20kA 0.3s & 10kA 1.0s
Neutral and earth bar	Current rating 250A M8 stud top and bottom Spare 1x16mm <sup>2</sup> & 1x25mm <sup>2</sup> tunnels QTY 2 x 25mm <sup>2</sup> tunnels Balance 16mm <sup>2</sup> tunnels Tunnels 2 screw
Main switch	Isolator 250A

## Concept Tough pole capacity and dimensions

Suits DIN-T applications (Concept Tough)

Pole capacity	Box size	Height	Catalogue no. mild steel Orange	Catalogue no. stainless steel orange
18	Size 2	1000	CTD18O	CTD18SSO
24	Size 2	1000	CTD24O	CTD24SSO
36	Size 2	1000	CTD36O	CTD36SSO
48	Size 2	1000	CTD48O	CTD48SSO
60	Size 3	1500	CTD60O	CTD60SSO
72	Size 3	1500	CTD72O	CTD72SSO
84	Size 3	1500	CTD84O	CTD84SSO
96	Size 3	1500	CTD96O	CTD96SSO

Width = 800mm Depth = 324mm includes door = 20mm excluding door handle

### Notes:

- If a larger isolator is required, an increase in box size may be required.
- If stainless steel is required, replace the "O" in the above Cat. No. with "SS".

# PANELBOARDS and AS/NZS 61439

## Ensuring compliance to latest standards

NHP catalogued Concept Panelboards have been verified to both AS/NZS 61439.2 and AS/NZS 61439.3.

The Concept Panelboards are marked to AS/NZS 61439.3 unless it falls outside the scope of this standard. AS/NZS 61439.3. Distribution Panelboards are intended to be operated by ordinary persons (DBO), so have additional requirements over and above of AS/NZS 61439.2.

### Is my Panelboard compliant?

NHP Concept Panelboards are compliant which can be identified by the required fields that must be durably marked on the panelboard and by supporting documentation such as Supplier Declarations of Conformity SDoCs as well as documenting other required characteristics.

#### What to look for on the panelboard

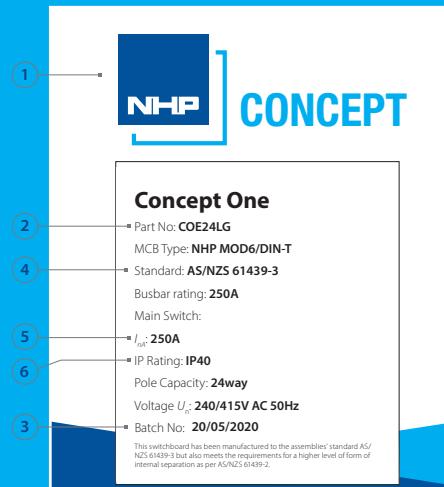

The assembly should be marked in a durable manner (not simple paper label) and be visible and legible when installed and in operation.

##### Required markings AS/NZS 61439.2 (items 1-4)

- 1) Manufacturer's name
- 2) Identification number
- 3) Means of identifying date of manufacture
- 4) 61439 standard that it is built to (i.e. Part 2 or 3)

##### Required markings AS/NZS 61439.3 (items 1-6)

- 5) Rated current of DBO  $I_{nA}$
- 6) IP rating if greater than IP 2Xc

Supplier Declaration of Conformity (SDoC)					
In accordance with ISO/IEC 17065 - 2005					
SDoC Identification Number: NHP0E.002					
See the Product Safety Information Document (PSID) for the detailed description of the product and its characteristics.					
Product details:					
Product Name: COE24LG					
Product Type: COE24LG					
Standard: AS/NZS 61439-3					
Other relevant standards:					
1. Design of electrical installations: IEC 60364-1					
2. Overvoltage protection: IEC 60364-4-42					
3. Protection against electric shock: IEC 60364-4-46					
4. Allocation of protective conductors: IEC 60364-4-48					
5. Protection against short-circuit currents: IEC 60364-4-52					
6. Protection against mechanical damage: IEC 60364-4-54					
7. Protection against lightning: IEC 60364-4-55					
8. Protection against electric arcs: IEC 60364-4-56					
9. Protection against overheating: IEC 60364-4-57					
10. Protection against electric shocks: IEC 60364-4-58					
11. Protection against electric arcs: IEC 60364-4-59					
12. Protection against mechanical damage: IEC 60364-4-60					
13. Protection against short-circuit currents: IEC 60364-4-61					
14. Protection against lightning: IEC 60364-4-62					
15. Protection against electric arcs: IEC 60364-4-63					
16. Protection against overheating: IEC 60364-4-64					
17. Protection against electric shocks: IEC 60364-4-65					
18. Protection against electric arcs: IEC 60364-4-66					
19. Protection against mechanical damage: IEC 60364-4-67					
20. Protection against short-circuit currents: IEC 60364-4-68					
21. Protection against lightning: IEC 60364-4-69					
22. Protection against electric arcs: IEC 60364-4-70					
23. Protection against overheating: IEC 60364-4-71					
24. Protection against electric shocks: IEC 60364-4-72					
25. Protection against electric arcs: IEC 60364-4-73					
26. Protection against mechanical damage: IEC 60364-4-74					
27. Protection against short-circuit currents: IEC 60364-4-75					
28. Protection against lightning: IEC 60364-4-76					
29. Protection against electric arcs: IEC 60364-4-77					
30. Protection against overheating: IEC 60364-4-78					
31. Protection against electric shocks: IEC 60364-4-79					
32. Protection against electric arcs: IEC 60364-4-80					
33. Protection against mechanical damage: IEC 60364-4-81					
34. Protection against short-circuit currents: IEC 60364-4-82					
35. Protection against lightning: IEC 60364-4-83					
36. Protection against electric arcs: IEC 60364-4-84					
37. Protection against overheating: IEC 60364-4-85					
38. Protection against electric shocks: IEC 60364-4-86					
39. Protection against electric arcs: IEC 60364-4-87					
40. Protection against mechanical damage: IEC 60364-4-88					
41. Protection against short-circuit currents: IEC 60364-4-89					
42. Protection against lightning: IEC 60364-4-90					
43. Protection against electric arcs: IEC 60364-4-91					
44. Protection against overheating: IEC 60364-4-92					
45. Protection against electric shocks: IEC 60364-4-93					
46. Protection against electric arcs: IEC 60364-4-94					
47. Protection against mechanical damage: IEC 60364-4-95					
48. Protection against short-circuit currents: IEC 60364-4-96					
49. Protection against lightning: IEC 60364-4-97					
50. Protection against electric arcs: IEC 60364-4-98					
51. Protection against overheating: IEC 60364-4-99					
52. Protection against electric shocks: IEC 60364-4-100					
53. Protection against electric arcs: IEC 60364-4-101					
54. Protection against mechanical damage: IEC 60364-4-102					
55. Protection against short-circuit currents: IEC 60364-4-103					
56. Protection against lightning: IEC 60364-4-104					
57. Protection against electric arcs: IEC 60364-4-105					
58. Protection against overheating: IEC 60364-4-106					
59. Protection against electric shocks: IEC 60364-4-107					
60. Protection against electric arcs: IEC 60364-4-108					
61. Protection against mechanical damage: IEC 60364-4-109					
62. Protection against short-circuit currents: IEC 60364-4-110					
63. Protection against lightning: IEC 60364-4-111					
64. Protection against electric arcs: IEC 60364-4-112					
65. Protection against overheating: IEC 60364-4-113					
66. Protection against electric shocks: IEC 60364-4-114					
67. Protection against electric arcs: IEC 60364-4-115					
68. Protection against mechanical damage: IEC 60364-4-116					
69. Protection against short-circuit currents: IEC 60364-4-117					
70. Protection against lightning: IEC 60364-4-118					
71. Protection against electric arcs: IEC 60364-4-119

176. Protection against electric arcs: IEC 60364-4-224					
177. Protection against overheating: IEC 60364-4-225					
178. Protection against electric shocks: IEC 60364-4-226					
179. Protection against electric arcs: IEC 60364-4-227					
180. Protection against mechanical damage: IEC 60364-4-228					
181. Protection against short-circuit currents: IEC 60364-4-229					
182. Protection against lightning: IEC 60364-4-230					
183. Protection against electric arcs: IEC 60364-4-231					
184. Protection against overheating: IEC 60364-4-232					
185. Protection against electric shocks: IEC 60364-4-233					
186. Protection against electric arcs: IEC 60364-4-234					
187. Protection against mechanical damage: IEC 60364-4-235					
188. Protection against short-circuit currents: IEC 60364-4-236					
189. Protection against lightning: IEC 60364-4-237					
190. Protection against electric arcs: IEC 60364-4-238					
191. Protection against overheating: IEC 60364-4-239					
192. Protection against electric shocks: IEC 60364-4-240					
193. Protection against electric arcs: IEC 60364-4-241					
194. Protection against mechanical damage: IEC 60364-4-242					
195. Protection against short-circuit currents: IEC 60364-4-243					
196. Protection against lightning: IEC 60364-4-244					
197. Protection against electric arcs: IEC 60364-4-245					
198. Protection against overheating: IEC 60364-4-246					
199. Protection against electric shocks: IEC 60364-4-247					
200. Protection against electric arcs: IEC 60364-4-248					
201. Protection against mechanical damage: IEC 60364-4-249					
202. Protection against short-circuit currents: IEC 60364-4-250					
203. Protection against lightning: IEC 60364-4-251					
204. Protection against electric arcs: IEC 60364-4-252					
205. Protection against overheating: IEC 60364-4-253					
206. Protection against electric shocks: IEC 60364-4-254					
207. Protection against electric arcs: IEC 60364-4-255					
208. Protection against mechanical damage: IEC 60364-4-256					
209. Protection against short-circuit currents: IEC 60364-4-257					
210. Protection against lightning: IEC 60364-4-258					
211. Protection against electric arcs: IEC 60364-4-259					
212. Protection against overheating: IEC 60364-4-260					
213. Protection against electric shocks: IEC 60364-4-261					
214. Protection against electric arcs: IEC 60364-4-262					
215. Protection against mechanical damage: IEC 60364-4-263					
216. Protection against short-circuit currents: IEC 60364-4-264					
217. Protection against lightning: IEC 60364-4-265					
218. Protection against electric arcs: IEC 60364-4-266					
219. Protection against overheating: IEC 60364-4-267					
220. Protection against electric shocks: IEC 60364-4-268					
221. Protection against electric arcs: IEC 60364-4-269					
222. Protection against mechanical damage: IEC 60364-4-270					
223. Protection against short-circuit currents: IEC 60364-4-271					
224. Protection against lightning: IEC 60364-4-272					
225. Protection against electric arcs: IEC 60364-4-273					
226. Protection against overheating: IEC 60364-4-274					
227. Protection against electric shocks: IEC 60364-4-275					
228. Protection against electric arcs: IEC 60364-4-276					
229. Protection against mechanical damage: IEC 60364-4-277					
230. Protection against short-circuit currents: IEC 60364-4-278					
231. Protection against lightning: IEC 60364-4-279					
232. Protection against electric arcs: IEC 60364-4-280					
233. Protection against overheating: IEC 60364-4-281					
234. Protection against electric shocks: IEC 60364-4-282					
235. Protection against electric arcs: IEC 60364-4-283					
236. Protection against mechanical damage: IEC 60364-4-284					
237. Protection against short-circuit currents: IEC 60364-4-285					
238. Protection against lightning: IEC 60364-4-286					
239. Protection against electric arcs: IEC 60364-4-287					
240. Protection against overheating: IEC 60364-4-288					
241. Protection against electric shocks: IEC 60364-4-289					
242. Protection against electric arcs: IEC 60364-4-290					
243. Protection against mechanical damage: IEC 60364-4-291					
244. Protection against short-circuit currents: IEC 60364-4-292					
245. Protection against lightning: IEC 60364-4-293					
246. Protection against electric arcs: IEC 60364-4-294					
247. Protection against overheating: IEC 60364-4-295					
248. Protection against electric shocks: IEC 60364-4-296					
249. Protection against electric arcs: IEC 60364-4-297					
250. Protection against mechanical damage: IEC 60364-4-298					
251. Protection against short-circuit currents: IEC 60364-4-299					
252. Protection against lightning: IEC 60364-4-300					
253. Protection against electric arcs: IEC 60364-4-301					
254. Protection against overheating: IEC 60364-4-302					
255. Protection against electric shocks: IEC 60364-4-303					
256. Protection against electric arcs: IEC 60364-4-304					
257. Protection against mechanical damage: IEC 60364-4-305					
258. Protection against short-circuit currents: IEC 60364-4-306					
259. Protection against lightning: IEC 60364-4-307					
260. Protection against electric arcs: IEC 60364-4-308					
261. Protection against overheating: IEC 60364-4-309					
262. Protection against electric shocks: IEC 60364-4-310					
263. Protection against electric arcs: IEC 60364-4-311					
264. Protection against mechanical damage: IEC 60364-4-312					
265. Protection against short-circuit currents: IEC 60364-4-313					
266. Protection against lightning: IEC 60364-4-314					
267. Protection against electric arcs: IEC 60364-4-315					
268. Protection against overheating: IEC 60364-4-316					
269. Protection against electric shocks: IEC 60364-4-317

271. Protection against mechanical damage: IEC 60364-4-319					
272. Protection against short-circuit currents: IEC 60364-4-320					
273. Protection against lightning: IEC 60364-4-321					
274. Protection against electric arcs: IEC 60364-4-322					
275. Protection against overheating: IEC 60364-4-323					
276. Protection against electric shocks: IEC 60364-4-324					
277. Protection against electric arcs: IEC 60364-4-325</td					

# Customised manufactured solutions that add value

Our National Manufacturing and Distribution Centre in Laverton, Victoria highlights NHP's commitment and expertise in local manufacturing. At this state-of-the-art facility, our expert team brings together a range of manufacturing services under one roof, enabling us to provide our customers with the service they require to meet their varied objectives.

NHP is dedicated to providing an end-to-end manufacturing service that brings together a range of value-add services extending far beyond the assembly itself. These services instill confidence across the lifespan of a project and ultimately enables customers to increase their efficiencies as well as lower the total cost to manufacture through a reduction in the build and commissioning time.

## Value-add services:

- Consulting
- Design
- Processes and production
- Project management
- Engineering
- Quality and compliance

## Key manufacturing solution groups:

- Power Distribution
- Energy Management
- Motor Control and Automation
- Hazardous Environments
